**TURKISH STEEL**

— STEEL EXPORTERS' ASSOCIATION —

Turkish steel industry is one of the leading sectors of Turkish economy. Since its establishment at the beginning of 1920's, Turkish steel industry has seen considerable innovations, reflecting a commitment to respond to the evolutions in global steel markets.

Steel industry in Türkiye has witnessed consistent growth, expanding exponentially in response to strong global demand for high quality steel products. Today, with its 26 electric arc furnace mills (EAF), 11 induction furnaces and 3 BOF plants, Türkiye's crude steel production has reached to 35.1 million tons in 2022. With these figures, in 2022 Türkiye was Europe's second crude steel producer, and eight (8th) largest in the world ranking of steel-producing countries.

Türkiye is also one of the biggest exporters of steel products, holding the sixth place among steel exporting countries and top exporter of reinforcement bars used for construction. With high quality products, competitive prices and effective marketing strategies, Turkish steel exporters has a large market coverage; Turkish steel products have been exported 200 countries and to all regions of the world.

By organizing this trade delegation to Albania, we are aiming to bring Turkish companies to explore areas of cooperation and new business prospects in order to create mutually beneficial and fruitful business relationships that will build a bridge between two countries to bring us even closer.

**ADNAN ASLAN**  
**STEEL EXPORTERS' ASSOCIATION**  
**CHAIRMAN OF THE BOARD**

## **ABOUT STEEL EXPORTERS' ASSOCIATION**

Steel Exporters' Association is one of six associations which has been operating under the body of General Secretariat of Istanbul Mineral and Metals Exporters' Association (IMMIB).

The Association is a non-profit business organization of more than 2000 companies representing the largest steel producers and exporters in the Turkish steel industry. It carries on its operations with the aim of increasing the export potential of the Turkish steel industry and paves the way for Turkish steel producers/exporters, with main objective to foster and attain sustainable global steel market based on free and fair trade. The Association also solves the problems of its member companies face at home and abroad, provides contact between members and foreign importers in order to ease the export processes, serves up-to-date domestic and global market news, reports and analyses.

### **MISSION**

Developing and implementing the strategies in order to increase the share of the Turkish steel exports in global markets and to maintain a sustainable global competitive strength.

### **VISION**

Guiding and assisting the members of Turkish steel sector to become a leading industry in the global steel trade.

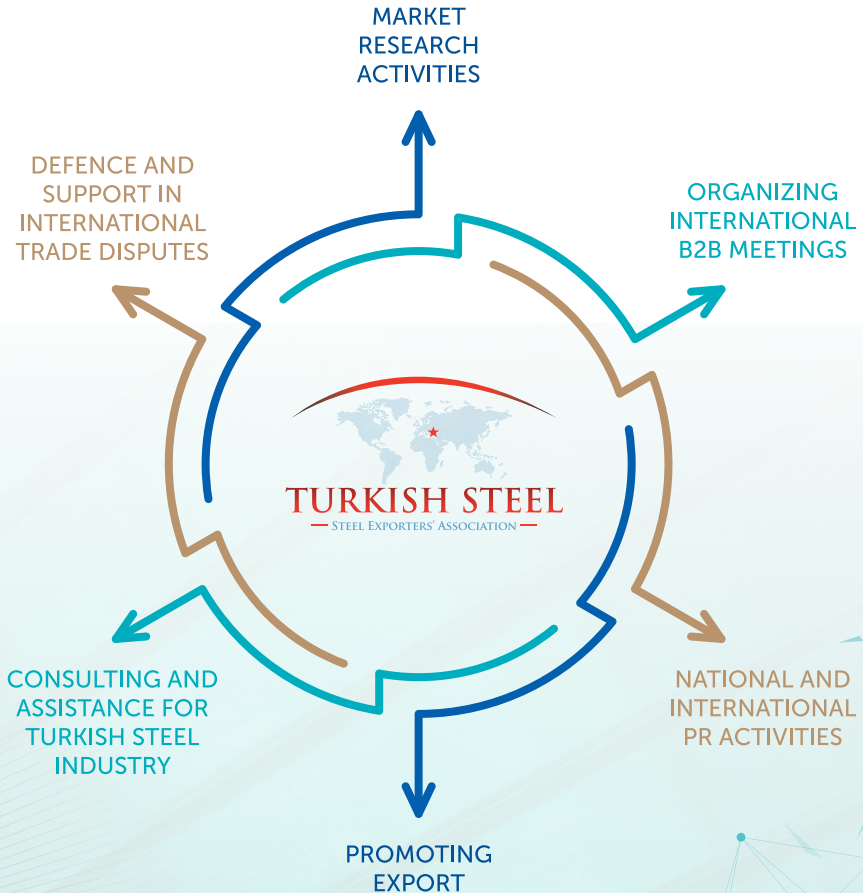

### **VALUES**

Quality, reliability, continuous improvement and innovation.

## WHY TURKISH STEEL?

### PRODUCTION CAPACITY

Proven to meet growing demand in the future Türkiye is the 8<sup>th</sup> largest crude steel producer in the world.

### EXPERIENCED AND SKILLED WORKFORCE

Excellent standards of training and education ensure an expert workforce for highest production standards.

### MODERN INFRASTRUCTURE

Consolidated investments have provided Türkiye a world-class infrastructure which enables the country to deliver its products faster.

### PROXIMITY TO MARKETS

Türkiye's position at the Aegean Region and proximity to key industrial markets means it can respond to demand quickly and on time.

### CONTINUED INVESTMENTS

Türkiye continues to invest in upgrading, enhancing and improving production methods and innovative products.

### LATEST TECHNOLOGIES

Production techniques integrate world standard technological practices.

### COMPETITIVE PRICING

Investments in technology provide state of the art production facilities and new production technologies mean that Türkiye can offer quality products at consistently competitive prices.

### GREENER STEEL

Türkiye is one of the few environment friendly steelmaker country in the world with 72% EAF route production, where average global AF route production rate is 28%.

## TURKISH STEEL INDUSTRY

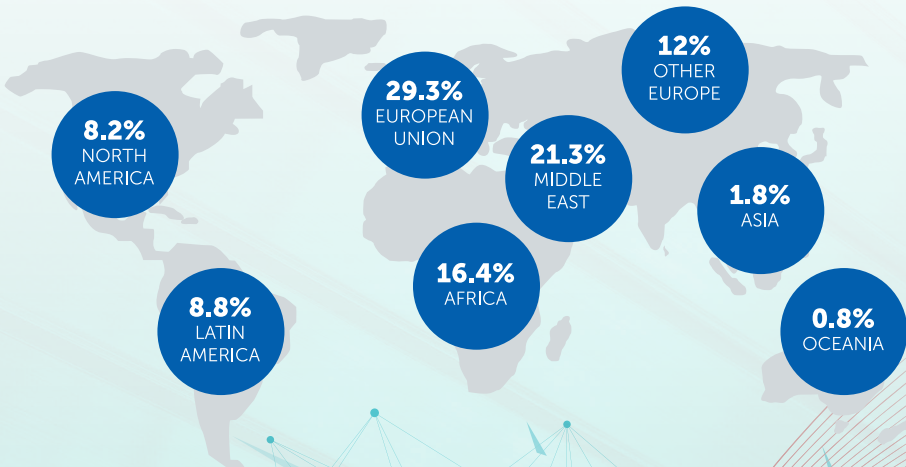

Today Türkiye has 26 electric arc furnace mill plants (EAF), 11 induction furnace plants and 3 BOF plants.

In 2021, global output increased to 1.95 billion tons, up by 3.7% on 2020. Türkiye's output was 40.4 million tons with an increase of 12.7% in 2021. In 2022, Türkiye's output was around 35.1 million tons with a decrease of 12.9% on 2021.

In 1996, The European Coal and Steel Community (ECSC) agreement was signed between the EU and Türkiye. With signing the agreement, customs duties on bilateral steel trade were abolished. The agreement allows Türkiye to trade its iron and steel products without customs duty with all EU member states. Additionally, the Government does not subsidize Turkish domestic steel industry due to the European Coal and Steel Community (ECSC) agreement.

All steel companies in the country are privately held, and Turkish steelmakers continue to pursue technological developments to enhance the long-term viability of the industry in the global marketplace. The steel industry has become one of the most developed sectors in Türkiye and today counts as the fourth largest contributor to the Turkish economy.

## TÜRKİYE'S STEEL EXPORT BY REGION (2022)

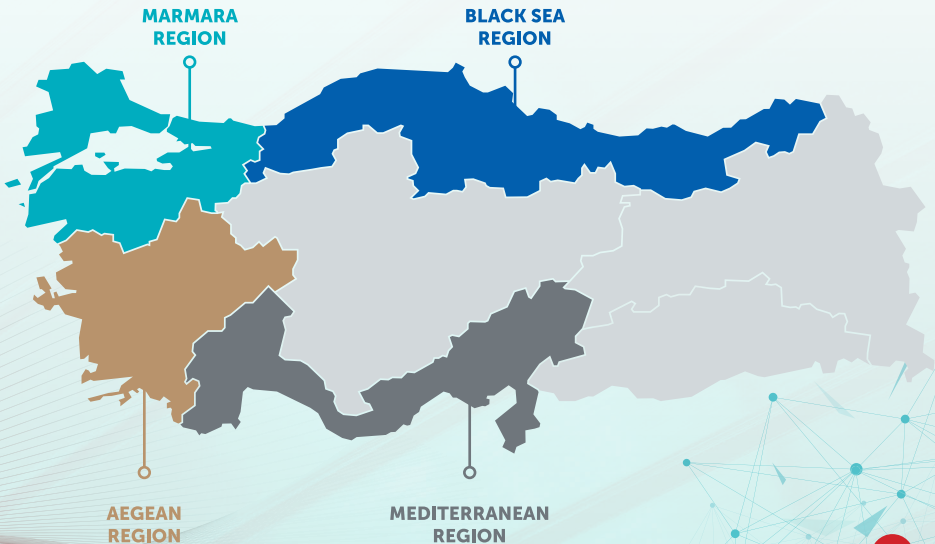

## KEY FACTS AND FIGURES

<b>WORLD'S LARGEST REBAR EXPORTER</b>	<b>EXPORTS TO 200 COUNTRIES</b>
<b>WORLD'S 8<sup>TH</sup> LARGEST STEEL PRODUCER</b>	<b>WORLD'S LARGEST IMPORTER OF SCRAP METAL</b>
<b>WORLD'S 6<sup>TH</sup> BIGGEST STEEL EXPORTER</b>	<b>72% OF STEEL PRODUCTION FROM STEEL SCRAP</b>
<b>SECOND PRODUCER OF STEEL IN EUROPE</b>	<b>35.1 MILLION TONS CRUDE STEEL PRODUCTION IN 2022</b>

## TÜRKİYE'S STEEL MAP

## A GROWING INDUSTRY

After 1980, with the implementation of import substitution system, Türkiye has increased her steel export to primarily neighboring countries such as Iran, Iraq and North African countries.

In the next 20 years, Türkiye realized a major production and export boom. While Türkiye was the world's 10<sup>th</sup> biggest steel producer in 2001, she has become the 7<sup>th</sup> biggest producer globally and largest steel producer in Europe in 2020. In fact, she was the third fastest growing steel producer in the world between 2020 and 2021.

In 2022, due to shrinking global steel demand, Türkiye's steel production decreased and declined to 8<sup>th</sup> biggest producer globally and second largest steel producer in Europe. On the other hand, in 2022 Türkiye has become 5<sup>th</sup> biggest steel exporter globally thanks to her high quality and competitive steel products.

## AĞIR HADDECİLİK A.Ş.

Agir Haddecilik A.S. is a steel manufacturer established in 1984 in Düzce. Along with operating a steel service center, we are specialized in manufacturing Patterned Sheets, Pipes and Profiles, Expanded Metal Sheets. Our main factory in Gebze has a capacity of 500.000 tons operating in 45.000 m<sup>2</sup> total space and 35.000 m<sup>2</sup> indoor space located 10 km away from port. Agir Haddecilik A.S. is considered to be one of the largest exporters in Turkey. We manufacture our metal sheets using state of the art technology and machinery. Our exported products are packaged usig high quality steel straps with the pallets, being reinforced with craft paper for maximum protection.

## AKÇELİK GROUP

Akçelik started its commercial activities in Izmir in 1978. Continuing its activities and investments in the high-quality steel sector with its 45 years of experience, Akçelik carries out its activities with the principle of operational excellence.

Akçelik, which continues to supply and sell high-quality steel for many years in line with customer demands, has taken its place among the leading companies of the sector by building up production, sales, and storage facilities in 7 locations in Türkiye, 1 in America and 2 in Europe, taking into account sectoral needs and company targets.

Akçelik, which has an annual production capacity of 200,000 tons with its recent investments, continues its activities with an activity area of 150,000 m2 and a stock capacity of 60,000 tons.

Thanks to our strong stock structure and supply network, we offer instant solutions to the demands of the sector in the field of Bright steel, Chrome Plated Bar and Tubes, Engineering Steels and Tool Steels.

In our Production and Steel Service Center which produces 7000 different types of high-quality steel products, we meet the needs of our industrialists with our understanding based on the principle of sustainability, high quality, on-time delivery, and trust.

## **AKKATOĞLU DÇ. SAN. İTH. İHR. VE TİC. LTD. ŞTİ.**

Akkatoglu Iron&Steel Company was established in Payas-Hatay, Turkey and operating since 1972. Akkatoğlu Iron and Steel are producing mainly cold drawn wire, black annealed wire, galvanized wire, barbed wire, PVC coated fence wire, hot-dip galvanized wire, construction nails, concrete nails, white&red roofing nails with caps according to international production norms.

With our strong customer portfolio, the company is also supplying steel products like reinforcement steel bar, wire rod, ribbed coil, wire mesh, Merchant Bars as black and hot-dip galvanized (Square, Round, Flat, T-bar, UPN, IPE, IPN, Eq.Angles), Transmission Mill, HRC, CR Coil, HDGC, Strips, Sheet&Plate, HDG Serrated Grated Mesh, ERW Hollow Section&Pipe, HDG Pipes, Our products are exported to several countries of the world, in addition to the domestic market.

The company has a reputable&respected name with his owner in the steel sector for the last half-decade. The company management aims at quality and customer-oriented production by providing continuous support to product research and development activities.

In addition, the company has been involved in projects in order to create sensitivity about the future of our country and our world on the social issues which he considers as "responsibility" rather than necessity and effective solution-oriented environmental policies.

## BMS BİRLEŞİK METAL SAN. TİC. A.Ş.

With its backdrop dating back to 1968, BMS WIRE was founded in İstanbul in 1999 to carry on business in the iron and steel industry. Initially starting its business by way of trade, BMS WIRE focused on the wholesale and retail of ribbed rebar. Reaching the highest trade tonnage in its history in 2011, the company proved itself with its approximately 180,000 tons/year of iron and steel trade and gained an important place in the industry.

In an attempt to contribute to the country's economy further in 2012, BMS WIRE made a Galvanized Steel Wire manufacturing plant investment on an area of 20,000 m<sup>2</sup> in Kocaeli Dilovası Machinery Specialization Organized Industrial Z one and started its production activities. BMS WIRE has gained a place in the sector by producing an annual average of 20,000 tons of Galvanized Steel Wire with a single production line from 2012 to 2017 and begun to export to more than 20 countries, especially European ones. Making progress at short notice towards becoming an international company, BMS WIRE put its second production line into service in 2017 and increased its annual production capacity to approximately 60,000 tons. Focusing its attention on value-added products with the technological advantages provided by the new production line and the know-how it developed, BMS WIRE continued its activities ceaselessly between 2018 and 2021 and became one of the leading wire manufacturers in Turkey, providing raw materials to important sectors such as Energy, Agriculture, Construction, Automotive and exporting to 45 countries, mainly European, North and South American countries.

Continuing to make technological investments relentlessly, paying attention to the sustainability of R-D projects with its innovative perspective and making it a principle to put customer satisfaction first, BMS WIRE continues to be on the way towards its aim to produce the highest quality wire in Europe and become a world brand.

## BOSKAY METAL SAN. VE TİC. LTD. ŞTİ.

Boskay Metal began its journey in the iron and steel industry with its rolling mill facility established in 1990, realizes production of hot rolled steel equal angle bars, flat bars, round bars and square bars. Apart from manufacturing its own products, the company is also a supplier of other steel products such as reinforcement bar, t-bar, hollow sections, galvanized steel bars, checkered steel sheet, hot rolled steel coils, cold rolled steel coils and commercial profiles.

With a production annual capacity of 350.000 tons and 250 employees Boskay Metal manufactures products safely used both in the domestic market and export markets. We have been exporting our products to around 100 countries all around the world; especially to Latin America, Central America, East and West Africa and to Middle East. According to the research of the Turkish Exporters Assembly; In 2021, we ranked 292nd among Turkey's top 1000 exporters, rising 54 ranks compared to 2020. Besides, we were ranked 496th in Turkey's Top 500 Industrial Enterprises List.

From production to logistics services, Boskay Metal which continuously improves all its processes in accordance with the current trends offers to its customers the opportunity to grow together by creating a competitive advantage. Our principles are customer satisfaction, sustainability, innovation for development, building powerful organizational culture, strategic management, people-oriented.

Together with all our stakeholders, we strive to produce value-added products and grow with firm steps.

## CORBUS METAL İÇ VE DIŞ TİC. LTD. ŞTİ.

Corbus are one of the main steel producer / supplier company in Turkiye, established in 1996. Corbus steel mill began to production of a wide range of steel products including equal angles, flat bars, square bars, deformed bars and plain bars and exported steel products to more than 130 countries over the world since established . Steel production capacity is 500,000 metric tons per annum.

We are supplier / producer of below mentioned steel products:

- Reinforcing Deformed Steel Bars (8-40 mm)
- Steel Billet, (100/120 /130 /150 mm square)
- Wire Rod(5,5-16 mm SAE 1006 -1070)
- Wires / Wire Mesh ,
- Merchant Bars (Angles,Flat , Round ,Square , Plain Bars) and IPE,IPN,UPN, H profiles
- Tubes, Water Pipe ,Structural Pipe,
- Hollow Sections (Square/Rectangular,Circular),
- Window Profiles (L-T-Z profiles),
- Cold Rolled Coil/Sheet,
- Galvanized Coil/ Sheet,
- Hot Rolled Coil/ Sheet,
- Checkered Sheet (Tear drop & Diamond Pattern)

## **CAKIROGLU ITH. IHR. METAL SAN. TIC. A.S.**

Established in 1969, CAKIROGLU METAL continues its operations with the third generation, visionary and dynamic management team located in Tuzla, Istanbul.

All our products are compatible with basic international standards such as; EN, BS, AFNOR, ASTM, DIN and TS.

Its product quality and reliability have been accredited by UKAS and TSE operating systems; meanwhile its outstanding performance in the area of use has been adopted by customers.

Hence, Cakiroglu Metal, aside from rebar and wire rod, mainly stock commercial Steel beams products in EU Norms/standards, slitted coil, sheet and coil readily available for immediate exports with a range as below:

Beam stock coverage for beams:

- UPN : 50 - 400 mm
- IPN : 80 - 300 mm
- IPE : 80 - 600 mm
- H BEAMS : 100 - 800 mm

HR

Coil, sheet and slitted materials  
1,20 - 30 mm wall thickness

CR

Coil, sheet and slitted materials  
0,30 - 3,00 mm wall thickness

GI

Coil sheet and slitted materials  
0,25 - 3,00 mm wall thickness

### **Products:**

Wire Rod, Rebar, Sections, Angles And Profile, Wire,  
Hot Rolled Flat, Cold Rolled Flat, Structural Steel,

# Çolakoğlu Metalurji

## ÇOLAKOĞLU METALURJİ A.Ş.

The roots of the Çolakoğlu Group's commercial operations reach back to 1945 and to an iron & steel shop belonging to the company's founder Mehmet Rüstü Çolakoğlu in Istanbul's Karaköy district. Çolakoğlu Metalurji's first rolling mill commenced operation in Sütlüce, also in Istanbul, in the 1950s. The company's operations gained a new dimension in 1969 with its steelworks investment in Dilovası, a town on the Gulf of İzmit east of Istanbul. Keeping pace with state-of-the-art steelmaking technologies, in 2007 Çolakoğlu Metalurji invested in an arc furnace that was the world's biggest at the time it was commissioned. With the commissioning of its hot-rolling mill in 2010, Çolakoğlu Metalurji became the first steelmaker in Turkey with the ability to produce steel from slabs sourced from its own electric-arc furnace. Çolakoğlu Metalurji's flat steel products contribute significantly to manufacturing operations in sectors ranging from pipes, re-rollers, automobiles and machinery to construction and agriculture. Çolakoğlu Metalurji made rebar is the backbone of Turkey's construction industry. One of the pioneers of Turkey's industrial development, Çolakoğlu Metalurji has annual production capacities of around 3.2 million tons of liquid steel and about 3 million tons of hot-rolled sheet steel; it can also produce 622,000 tons of rebar a year. Çolakoğlu Metalurji's plant is equipped power plants whose combined 566 MW installed capacity supplies energy requirements of the company's production operations. In 2021 the company initiated a project to increase its HRC capacity. Slated for completion and commissioning during the first quarter of 2023, this project will HRC capacity production boost Çolakoğlu Metalurji's annual HRC production capacity to 4.5 million tons. Exporting its products to more than 150 countries, Çolakoğlu Metalurji makes a significant contribution to the Turkish economy.

**EKİNCİLER IRON AND STEEL IND. INC.**

## **EKİNCİLER DEMİR VE ÇELİK SAN. A.Ş**

In Turkey, the private sector saw a rapid growth in the 1950's and sustained its growth at a faster pace in the 1960's, the decade when the first seeds of Ekinciler Group were planted. Ali Ekinci (1926-1988), a former tradesman, realized the importance of iron and steel industry for the national development efforts and he decided to lay his hands on the industrial production. When Orhan Ekinci (1945-1989) became the president, the group made a huge leap forward. Following Ali Ekinci's footsteps, Orhan Ekinci led the company to the route of rapid growth.

In 1970's, the group built a rolling mill in Karabük. Foreign trade and international transportation operations were also started in the same decade. Following this rapid growth, Ekinciler Holding was incorporated in 1986.

Ekinciler Holding focused mainly on exporting goods in the 80's. Ekdemir Iron and Steel Plant was established in İskenderun in this decade. Financial services, sea and land transportation, and construction works were the main business activities in the 1990's.

The 90's were the decade when Ekinciler Holding adopted and started practicing the total quality approach. A general reorganization effort started following this initiative.

In our globalized world, Ekinciler Holding proficiently keeps up with the tough competition, managing its growth without losing its focus on quality, adding value to society and contributing to the national economy. A leader in construction and contract services, maritime industry, investment and securities, stock brokerage, and iron and steel sector, Ekinciler Holding runs toward a better future with steady strides, leaning on and improving the heritage of its founders.

# FECON

global sourcing company

## FECON DIŐ TİCARET A.Ő.

### Fecon Foreign Trade

Thanks to the experience we have gained in the iron and steel industry for many years, we supply iron and steel products to all over the world in line with our customers' needs and also support them in financing, logistics, quality control and customs clearance stages.

Our company also aims to provide technical information and support on product selection, alternative quality research/presentation and world trends on your focused products.

FECON has several years of experience to provide Turkish suppliers to increase their export capacity. With our enormous network lines, we are able to provide products based on our customers' preferences along with the competitive prices. The fact that we are in contact with metal markets all around the world, it directs us to analyze iron and steel trends in wider perspective and forecast the market trends accurately. We do not hesitate to share our market knowledge with our customers to support their sales. Also, as first abbreviation of FE in our name represents "Far East", we aim to create a path for our customers' to make them safe, continuous and advantageous trade with Far Eastern suppliers.

### Products:

Billet, Slab, Bar And Rods, Wire Rod, Rebar, Sections, Angles And Profile, Wire, Welded Tubes And Pipes, Coated And Plated Flat, Hot Rolled Flat, Cold Rolled Flat, Screws, Nuts And Bolts, Nail, Chain, Netting, Fencing, Cloth And Grills, Structural Steel, Construction Appliances, Highway Safety Systems  
Lighting Pole, Noise Barriers, Electrical Panel, Steel Shelf Systems, Prefabricated Buildings, Wireways, Valves

## FERİNEKS ÇELİK ÜRÜNLERİ SAN. VE TİC. A.Ş.

Ferineks is a steel supplier company from Istanbul/Turkey. Our priority is to be one of the fastest steel service companies in 'Iron and Steel Market'. We strive to be a reliable, transparent and competitive partner in local and global scale for steel and iron products.

Ferineks was incorporated in 2007 with its first service facility located in Istanbul/Turkey. Today, this location, which is also the headquarters of the company continues to operate having one slitting line and one cut to length line. Ferineks Istanbul location has an inhouse laboratory to test incoming goods for quality purposes. Our laboratory is equipped with a ZWICK tensile tester along with additional equipment for coating thickness measurement. This capability creates an advantage for Ferineks to meet even the most demanding expectations of our customers who are sensitive for mechanical values and overall product quality.

With the effect of growing customer range and shipment quantities, Ferineks established a 2nd service center in Manisa/Turkey as of 2019. The aim of a secondary service center is being at the close proximity of buyers thus reducing lead times. Ferineks Manisa facility has one slitting line and one cut to length line.

Our domestic and export customer portfolio consists of the following industries: Automotive, White goods and spare parts, Construction and side industries, Machinery and spare parts, Panel Radiator, Gas water heaters, Lighting, HVAC, Cable and electrical panel systems.

Our processed products are Hot Rolled Flat, Cold Rolled Flat, PPGI(pre-painted galvanized iron), HDG (Hot-dip galvanized), Aluminized Steel (aluminium silicon and aluminium zinc), Zinc Magnesium Steel and Non Grain Oriented Steel. Ferineks possesses all the required equipment and infrastructure to cut and slit these product groups. As a part of trading business unit Ferineks also offers hollow sections, pipe fittings and wire rod.

### Products:

Bar and Rods, Wire Rod, Sections, Angles and Profile, Welded Tubes and Pipes, Coated and Plated Flat, Hot Rolled Flat, Cold Rolled Flat, Structural Steel, Highway Safety Systems, Lighting Pole, Noise Barriers, Electrical Panel, Steel Shelf Systems, Wireways, Panel Radiator

## GAZİ METAL MAMULLERİ SANAYİ VE TİC. A.Ş.

GAZİ METAL was established in 1987 as a Turkish steel company producing Cold Rolled Coils (CRC) and Hot Rolled Pickled & Oiled (HR P&O) Coils in its Karasu Mill in city Sakarya of Türkiye. The company also serves as a steel service center to supply cold rolled and hot rolled cut-to-length sheets and slit strips.

GAZİ METAL produces the following flat steel products and exports them more than 70 countries in 4 continents:

- Cold rolled steel coils, cut -to-length sheets and slit strips (0,28 - 2,50 mm thickness, max. 1524 mm width)
- Hot rolled pickled & oiled coils, cut -to-length sheets and slit strips (1,5 - 6,0 mm thickness, max. 1524 mm width)

### Products:

## IŞIK ÇELİK SANAYİ VE TİCARET A.Ş.

Founded in 1965, we, IŞIK STEEL INDUSTRY & TRADE CO., INC., is one of the oldest steel manufacturers in TURKEY, specialized in the production of HOT ROLLED STEEL MERCHANT BARS; STEEL EQUAL ANGLES, FLAT BARS, SQUARE BARS AND ROUND BARS, HAMMERED SQUARE AND FLAT BARS, GALVANIZED MERCHANT BARS, U CHANNELS, I BEAMS, H BEAMS

Our company has a steel mill with the 350.000 metric tons annual production capacity in KARABUK, where is located in Black Sea region of TURKEY. Our 55-year-production experience, manufacturing well-assorted products with various steel grades and international standards provide us high market reputation as well competitiveness upon other steel manufacturers in Turkey.

IŞIK STEEL INDUSTRY & TRADE CO., INC., has been awarded with 3rd place in " STARS OF STEEL EXPORT AWARDS 2018 " for " MOST EXPORT GROWTH " category which is organised by TURKISH STEEL EXPORTERS' ASSOCIATION. Also with its export sales performance in 2019, our company became one of the "TOP 50 TURKISH STEEL EXPORT COMPANIES"

İÇDAŞ ÇELİK ENERJİ TERSANE VE ULAŞIM SANAYİ A.Ş.

## İÇDAŞ ÇELİK ENERJİ TERSANE ve ULAŞIM SANAYİ A.Ş.

Since 1970, we are among the top steel producers in our country in the steel production. We are one of the biggest producers of steel among the largest private sector steel producers with regard to our production capacity. We maintain our top rank in the export listing prepared in the sectoral basis each year. In addition to steel production, which is our main field of operation, we conduct our activities in the fields of energy, shipyards, logistics (sea, land), transportation (air), port management, ship management, construction, insurance, mining, agriculture and animal husbandry with the same precision. Our Değirmencik Integrated Plant in Biga, Çanakkale features three steel plants with a capacity of 4,5 million tons/year and four rolling mills with a capacity of 4 million tons/year. As to capacity, the biggest construction steel processing rolling mill of our country is in our plant with 1.9 million tons/year. Of our two shipyards, Aksaz Shipyard (dry pool) have been operationalized in 2020, and is the first and only shipyard which has the capacity to manufacture an aircraft carrier in our country. Three-unit 405 mW thermal power plant, four HPP, one SPP, two piers, two dock are among the largest private sector port facilities in Turkey with a daily loading capacity of 30,000 tons and offloading capacity of 60,000 tons. And the auxiliary facilities of these units are included. In addition to the Değirmencik integrated plant, our two-unit power plant with a capacity of 1,236 megawatts in the Bekirli village connected to Biga, and our wind power plant with a licensed installed power of 60 megawatts and our seed bank with a capacity of four hundred thousand tons in Biga are in operation.

## MADES SEEL

Madeş Steel Trade Ltd. was established in 1978 and has been providing services as a steel service center. Madeş Metal continues its activities in its facility in Dilovası Makine OSB, built on 20,000 m2, where it completed its investment in 2019. The company has an active steel service center with an annual capacity of 200,000 tons.

The steel service center includes HDG, PPGI, HR, HRP, CR product sales slitting, cut-to-length, trapeze, groove, roller and ridge production lines. Madeş Metal, whose most important priority is to work with a focus on high quality and customer satisfaction, can provide a better quality service to its customers with the investments it has made within this framework.

Madeş Steel, the most modern and comprehensive Steel Service Center in our country, has exported to 42 countries. Its export sales started in 2020, and have become one of the few companies in the international market.

## **MMK METALURJİ SAN. TİC. VE LİMAN İŞLETMECİLİĞİ A.Ş**

MMK Metalurji, which has announced its name to the world in steel letters; was established in Turkey to build a stronger future and to create permanent satisfaction in steel industry with its bright vision.

MMK Metalurji, Turkey's largest industrial enterprise established from scratch, with a capital of 2.3 billion dollars, adds a vision to steel with its goal of adding value to the country's economy and awareness of its global responsibilities.

With its Kocaeli Dilovası and Hatay Dörtyol facilities, which are strategically important points in Turkey, it is in the leading position among the manufacturers of hot, galvanized and painted flat steel products with its electric arc furnace technology in the world.

It brings together the light of science and steel in its accredited laboratories, where it serves its customers and stakeholders by using advanced technologies.

Established in Hatay Dörtyol in 2010 with a length of 1800 meters and a berthing capacity of 12 ships up to 100,000 DWT, MMK Port proudly serves as the safe harbor of the Turkish industry.

With the pride and deep-rooted history of being 32nd among Turkey's 500 largest industrial enterprises and 10th in the sectoral ranking in the "Top 1000 Exporters Survey", it continues to add strength to its strength on the way it set out with the goal of building a strong and bright future.

We are MMK.

The Power That Makes Us Who We Are, is Our Steel Labor!

## OMSE DEMİR ÇELİK TELEKOMÜNİKASYON BİLİŞİM SAN. İNŞ VE DİŞ TİC. LTD. ŞTİ

OMSE is a young company founded in 2013 although our team gained many years of experience in steel industry prior to the establishment of company. Our founding objective is to primarily supply engineering services and structural steel solutions to our customers. The main objective of our company is to show the quality and the competitive advantages of Turkish steel products to the companies located abroad and to bring them and these products together.

OMSE carries out the necessary controls at every stage of production and inspects the product quality on behalf of our customers in order to ensure that the products it sells comply with customer demands, technical specifications and/or technical drawings. In this way, errors are prevented and/or corrected at an early stage before the products go to the assembly site, and our customers can be sure that they will receive products comply with the quality and standards they want. Our company achieved to export to over 30 countries in the past 10 years and obtains averagely over 95% of its turnover from exports.

Services and Steel products we offer;

Engineering Services: Transmission Line Tower Designs, Designs of Telecom Towers, Designs of steel structures for substations, Designs of steel buildings, Technical consulting services

Our design works include the scopes listed below: Static Calculations, Foundation Calculations, Workshop Drawings, Assembly Drawings

Structural Steel Products: Lattice and polygonal telecommunication towers, Lighting, Floodlighting and camera poles, Energy Transmission Line Towers, Steel Masts for Railways, Substation Steel Structures, Steel Structures for Solar Panels, Steel Bridges, Steel Structures for Industrial Buildings, - General Structural Steels, Umbrella Arch Systems, Steel Arches, Lattice Girders, Self- Drilling Anchor Bolts, Rock Bolts

### Products:

# POLAR

DIŐ TİCARET LTD. ŐTİ.

## POLAR DIŐ TİC. LTD. ŐTİ

Polar is a 31 year old steel trading company who has also a sister company in Germany Meba Steel GMBH. POLAR has a very large supplier chain mainly in Turkey and Europe and has been supplying all kind of Steel products all over the world for special/mega projects. Polar also has its own stocks in Turkey for EU origin plates having S355J2+N/K2/NL quality with US EN 10160-S2E2 Test starting from 10 mm to 250 mm ready for prompt shipment. We are also highly experienced in the supply of Steel Sections and flat products listed in the main headings below and import them regularly

### Flat Products

Hot Rolled Alloyed and Non Alloyed acc. to ASTM/ASME/EN/JIS/DIN/GOST Norms, Cold Drawn Plates and Strips  
Galvanized Steel Coils/Sheets  
Stainless Steel Sheet/Plate/Coil

### Long Products

Steel Profiles acc. to American/British/European/Japanese/Russian Norms (HEA/HEB/HEM/IPE/UPN/UPE/HD/HL/HP/UB/UC/UBP/W/UE/H)  
Steel Angle/Round Bar/Hollow Section/ Crane Rails/ Forged Products  
Alloyed and Non Alloyed Seamless/Welded Pipes/ Line Pipes

### Others

Fittings/Fasteners  
Alloyed and Non Alloyed Seamless/Welded Elbow/ Tee/Reducer/Stud End/Valve/Cap/Sockolet/Weldolet/ Flange/Bolt/Nut/Washer/Screw

Geotechnical+Structural Engineering Systems/  
Products  
Anchor/PC Strand/Steel Wire  
Special Steel Profile acc. to the design

### Products:

Bar and Rods, Wire Rod, Rebar, Sections, Angles And Profile, Seamless Tubes And Pipes, Welded Tubes And Pipes, Pipe Fittings, Coated And Plated Flat, Hot Rolled Flat, Cold Rolled Flat, Structural Steel, Valves

# **T** tekin boru

## TEKİN BORU SANAYİ VE TİCARET A.Ş.

Tekin Boru produces steel pipes in its production facility located in Dörtöyl district of Hatay around Iskenderun Bay.

The dimensions of the pipes produced in Tekin Boru production facilities in accordance with national and international standards vary depending on the customer's request:

- 219 mm - 3048 mm diameter
- 3 mm - 25 mm wall thickness
- 4 meters - 40 meters in length

The steel pipes produced are protected against corrosion through coating methods such as polyethylene, epoxy, concrete and bitumen.

Tekin Boru carries out the inspections and tests required by national and international standards using its own machinery, apparatus and equipment. It tests the chemical and physical properties of the products in its own laboratory.

It provides added value to the country's economy by exporting to more than 30 countries, especially Central Asia, Europe and Africa.

Tekin Boru shares the advantages of the region where it is located with its customers in the form of logistics and delivery time.

## TOSYALI HOLDİNG

### TOSÇELİK PROFİL VE SAC END. A.Ş.

TOSÇELİK Profile and Sheet Industry Co., which operates under Tosyalı Holding, was established in 1997 in Iskenderun Industrial Zone for ERW(Electric Resistance Welding) pipe and hollow section production.

Ranked in the ISO 500 list for the first time in 2000, Tosçelik established Turkey's most modern spiral pipe plant with the largest capacity in Osmaniye Industrial Zone in 2008. The plant started production at the beginning of 2009.

Continuing its investments without slowing down, the company produced the first special hot rolled flat product in 2009 at Tosçelik Osmaniye Structural Steel Production Plant, which had been constructed in 18 months. This investment stands out as the first flat steel production facility constructed from scratch by the private sector of the Republic of Turkey.

In 2012 the pipe and profile plant started production in Osmaniye Organized Industrial Zone. The plant is Turkey's largest and Europe's second largest manufacturer of ERW pipes and has the largest indoor space under a single roof, in Europe.

In 2016, Tosçelik ranked 90th out of the top 1000 companies among 61,000 exporters and was awarded 'the Company with the Largest Export Breakthrough' at the TIM's (Exporters Council of Turkey) 'Export Champions' ceremony.

Exporting products to 135 countries, Tosçelik continues its activities that shape the industry, and its local and international investments that will contribute to the country, people and nature.

# YILDIZ DEMİR ÇELİK

## YILDIZ DEMİR ÇELİK

Yıldız Demir Çelik is an investment by Yıldızlar Yatırım Holding, which has made significant investments in Türkiye and worldwide since 1890, to contribute to the development of the iron and steel industry.

Founded in Kocaeli Alikahya Organized Industrial Zone on 300,000 square meters in 2018 and driven by an experience of over a century, we introduce the quality of Turkish steel to the entire world at Yıldız Demir Çelik through our development- and people-oriented approach and export operations to over 50 countries across 5 continents. Committed to offering high-quality products and ensuring customer satisfaction, we are achieving the fastest growth in our industry and providing our business partners with the best experience. We aim to become a global brand in our field.

Combining technology with quality, we carry out our manufacturing operations with a Continuous Pickling Tandem Line (with a 1,300,000 ton-capacity), Cleaning Line (with a 300,000 ton-capacity), Batch Annealing Line (with a 270,000 ton-capacity), Temper Rolling Line (with a 400,000 ton-capacity), Color Coating Line (with a 150,000 ton-capacity), and Continuous Galvanizing Lines (with a 700,000 ton-capacity) while responding to the needs of our customers operating in various industries, including whitegoods, automotive, panel radiator, silo, packaging, sandwich panel, and energy, with our Slitting Lines (with a 160,000 ton-capacity), Cut-to-Length line (with an 80,000 ton-capacity), and Trapezoidal Line (with a 30,000 ton-capacity) at our Steel Services Center.

In our laboratories, the first ones to be accredited by the ISO 17025 standard for tensile testing along with galvanized and painted product testing in the Turkish flat steel industry, we serve both internal and external customers.

Adopting the ISO 10002 Customer Satisfaction Management System, we strive to ensure customer satisfaction and serve our business partners via our user-friendly Stargate Customer Portal for the best customer experience and active process management.

As the first iron and steel company that uses grey water in Türkiye, we implement many environmentally-friendly practices, including waste-water recovery and carbon footprint calculation, conducting dedicated efforts to leave a sustainable world to future generations.

Guided by the light of science and technology and operating with a focus on high-quality products and services, we are at the heart of life, aspiring to add value to the industry through our customer and employee satisfaction projects and to go beyond steel!
