

Messe
Düsseldorf

Important Notes

2026

Technical supply

On the last exhibition day the supply of electricity, water and compressed air is stopped one hour after fair conclusion for safety reasons. If you require electricity for deconstruction purposes, please contact the technical services counter in the fair management or the electrician in the hall.

Technical installation/services – Forms "Stand walls/Paper hanging", "Electrical Installations Hall", "Stand lighting" and "Sanitary Installations/Compressed Air" With the forms "Stand walls/Paper hanging", "Electrical Installations Hall", "Stand lighting" and "Sanitary Installations/Compressed Air" technical services can be ordered. A sketch with placement should be attached to the order form, otherwise placing takes place at the discretion of the Messe Düsseldorf.

Noise level regulations

The use of acoustic advertising mediums will, if necessary, be controlled by an acoustics engineer. The resulting costs will then be passed on to the exhibitor.

Authorization for welding, cutting, and abrasive cutting

All work involving an open flame and/or sparks requires written authorization. This authorization contains information on the protective measures. The area must be protected against sparks and strong heat dissipation. Fire-fighting agents must be provided close by and produced upon request of an authorized representative of the Messe Düsseldorf. Once the work is complete, a responsible person must inspect the work areas to ensure that they do not pose a danger – e.g., through the presence of embers, smoke etc.

Orders

Reservations and orders can usually be made as soon as you have registered with OOS. They must be completed in full and must be submitted via OOS by the relevant dates, specified separately. If forms are submitted late, Messe Düsseldorf can give no guarantee that work will be completed properly or on time and/or may then be unable to perform the relevant work at all.
